

2011-2012 Basic and Clinical Science Course, Section 7: Orbit, Eyelids, and Lacrimal System (Basic & Clinical Science Course)

Details the anatomy of the orbit and adnexa, and emphasizes a practical approach to the evaluation and management of orbital and eyelid disorders, including malpositions and involuntional changes. Updates current information on congenital, inflammatory, infectious, neoplastic and traumatic conditions of the orbit and accessory structures. Covers key aspects of orbital, eyelid and facial surgery. Includes numerous new color images. Major revision 2011-2012.
