

This is the written summary of the audio cme program that accompanies the paid subscription. Audio-Digest is providing this summary via Kindle as a service to our subscribers and as a sample to the general public. Purpose: Audio-Digest Foundation CME/CE activities are designed to provide its learners – physicians and other healthcare professionals – with continuing education that will help identify clinical problems in their practice settings, provide content to help to solve those problems, and increase their application of knowledge to practice. The goal of this program is to improve the clinical management of intoxicated patients, patients with behavioral emergencies, and patients with salicylate poisoning. After hearing and assimilating this program, the clinician will be better able to: 1: Identify and treat patients intoxicated on new designer drugs. 2: Clinically manage the intoxicated patient with a behavioral emergency. 3: Differentiate between the symptoms of common drug intoxications. 4: Recognize when patients presenting with intoxication and suicidal ideation can be safely discharged. 5: Diagnose and manage salicylate poisoning, avoiding common errors.

Gastroenterology: Short Bowel Syndrome/Small Bowel Mucosal Disease (Audio-Digest Foundation Gastroenterology Continuing Medical Education (CME). Volume 27, Issue 09), The Physical Life of Woman, Lecture Notes on Dermatology, Jai Shiva!: Kirtan for Shivaratri, Bates Guide to Physical Examination, Any Means Necessary (Modern Plays), Guia del Terrario - Tecnica Anfibios Reptiles (Spanish Edition), Developing Jazz Technique for Clarinet(Book & CD) (Jazz Method for Clarinet), Fertile Rock (Irish Edition),
