

Purpose: Audio-Digest Foundation CME/CE activities are designed to provide its learners – physicians and other healthcare professionals – with continuing education that will help identify clinical problems in their practice settings, provide content to help to solve those problems, and increase their application of knowledge to practice. Audio-Digest Emergency Medicine is specifically designed to provide the participant with state-of-the-art information, including, but not limited to, the care of patients presenting to the emergency department in such areas as: Airway management Asthma Bite wounds Burns Cardiovascular emergencies Domestic violence Drug abuse Envenomations Infectious diseases Ingested foreign bodies Gastrointestinal emergencies Psychiatric emergencies Risk management Pain management Poisoning & Toxicology Resuscitation Sports injuries Trauma Educational Objectives The goals of this program are to improve the diagnosis and management of excessive crying in infants and neonatal emergencies. After hearing and assimilating this program, the clinician will be better able to: 1. Differentiate among common causes of excessive crying in an infant. 2. Choose laboratory tests that are necessary and relevant for diagnosing the cause of excessive crying. 3. Identify infant abuse based on history, physical examination, and test findings. 4. Manage shock, seizures, and apnea in the neonate. 5. Determine the causes of and manage vomiting in the neonate.
