

Eye for Excellence: Masterworks from Winterthur

This catalogue, a companion to Winterthur's first changing exhibition of the same name, features the best of the museum's collection according to its own curators. More than 90 objects from the exhibition are examined in the catalogue, including ceramics, glass, furniture, paintings, prints, metalwork, textiles, books, and other materials from the library. The catalogue offers a rare opportunity to understand how the curators at Winterthur view the objects in their care.
