

Diagnosis and Treatment of Hepatocellular Carcinoma (Greenwich Medical Media)

The book is edited by a multidisciplinary team, with an international group of contributors. After discussing the basic and clinical aspects of HCC the main focus of the book is on diagnosis and therapy. The book is both authoritative and practical, providing expert guidance on the various techniques used in diagnosis, such as ultrasound, CT and MRI and the appropriate therapeutic options, for example, surgical resection, transcatheter therapies and radiofrequency ablation. It is fully illustrated throughout in both colour and black and white.
