

Deliver quality healthcare in the most challenging field conditions. Comprehensive yet compact, practical, and enduring, *Improvised Medicine: Providing Care in Extreme Environments, Second Edition*, is the one book to toss into your bag when going to practice medicine in global, disaster, or other resource-poor settings, including theaters of war, regions of civil unrest, and economically deprived areas. Full of practical clinical pearls and field-tested strategies, this indispensable guide provides detailed instructions on how to work successfully outside of your comfort zone. It demonstrates how to devise effective treatment solutions when the traditional tools (medications, equipment, and staff) are unavailable or when providing care outside your primary area of expertise. In any crisis, from power failures and computer crashes to floods, tsunamis, and earthquakes, knowing how to deal with the unique challenges encountered saves lives and communities. This reference gives you that knowledge and inspires innovative crisis resolution.

FROM REVIEWS OF THE FIRST EDITION: Dr Iserson has given us a most remarkable book. Many readers may be familiar with David Werners lay healthworker book, *Where There Is No Doctor*; this new volume could be titled *Where There Is a Doctor—But No Stuff*. Drawing from his experience providing care in international, wilderness, and disaster settings, he has compiled an impressive collection of bare-bones equipment and work-around strategies to provide the best possible care in resource-poor settings. While presenting many creative examples, the purpose of the book is not to offer an exhaustive list of solutions to missing resource challenges but to inspire creativity in readers who may find themselves needing to improvise. -- Family Medicine

“There is a lot of material here and, if nothing else, it may motivate more people to practice low-tech medicine and be willing to go where health care is dependent more on caring than on cost. I recommend this book to anyone who must practice in austere environments, and it will be in my rucksack when I respond to the next disaster.” – *The Journal of Emergency Medicine*
