

# An Introduction to AutoCAD 2013 for Civil Engineering Applications

The main purpose of this book is to provide civil engineering students with a clear presentation of the theory of engineering graphics and the use of AutoCAD 2013. Each chapter starts with the chapter objectives followed by the introduction. The contents of each chapter are organized into well-defined sections that contain step-by-step instructions to carry out the AutoCAD commands. The drawings shown in this book are created using AutoCAD 2013 and Paint software. Several improvements have been made to this edition. An index has been added and one of the chapters has been partitioned into two chapters, hence the twenty two chapters. Chapter chapter 19, Suggested In-Class Activities, has been improved and provides in-class activities (or labs). For some of the initial ICAs, it explains the drawing with the help of step-by-step instruction. Also, new problems have been added to the homework s chapter. Furthermore, the contents and the drawings of every chapter are improved. Each chapter starts with the chapter objectives followed by the introduction. The bulleted objectives provide a general overview of the material covered. The contents of each chapter are organized into well-defined sections that contain detailed step-by-step instructions with graphical illustrations to carry out the AutoCAD commands. This book has bee categorized and ordered into nine parts: Introduction to AutoCAD 2013 Use of AutoCAD in land survey data plotting The use of AutoCAD in hydrology Transportation engineering and AutoCAD AutoCAD and architecture technology Introduction to working drawing Suggested drawing problems Bibliography Index Table of Contents 1. Introduction to Engineering Graphics 2. Getting Started with AutoCAD 2013 3. Basics of 2-Dimensional Drawings 4. Basics of 2-Dimensional Editing 5. Layers 6. Blocks 7. Layout and Template Files 8.

Dimensioning Techniques 9. Land Survey  
10. Contours 11. Drainage Basin 12.  
Floodplains 13. Road Design 14.  
Earthwork 15. Floor Plan 16. Elevation 17.  
Site Plan 18. Construction Drawings 19.  
Suggested In-Class Activities 20.  
Homework Drawings 21. Bibliography 22.
