

## Non-Pharmacotherapies for Diabetes

Since most diabetics usually rely on pharmacotherapy without due attention to non-pharmacotherapies, their condition is often aggravated rapidly which brings not only adverse impact on their physical and mental health but also a burden on their families. This book concentrates on such non-pharmacotherapies as psychotherapy, kinesitherapy, Qigong therapy, acupuncture and moxibustion therapy, etc. for the prevention and treatment of the disease.
